

"Standard red pigment for the plastics industry"

The formulation of cost effective and high performance red shades for plastic applications is now made easier with **Cinilex® DPP Red SR2P**. Its selection provides colorists with the opportunity to use a reduced organic red pigment portfolio through standardization, replacing other organic red and Molybdate pigments, whilst providing outstanding performance, such as heat, light, weather and migration resistance and satisfying all of today's stringent regulatory requirements. When faced with the challenge of a red formulation – choose Cinilex® DPP Red SR2P a true standard red pigment for the plastics industry.
